[IMEI -The Institute of Marine Engineers (India)]

Subject: Proposal for Strategic Collaboration – Diagnostic & Preventive Healthcare Services

Respected Sir,

We are pleased to submit this proposal for your kind consideration.

Life care Introduction:

Lifecare is a leading and trusted name in the pathology and diagnostics industry, established in **July 1995** by **Dr. Vinay Goel**, Promoter, Director, and Chairman. With nearly **three decades of proven excellence**, Lifecare has consistently delivered world-class diagnostic and preventive healthcare services to **corporates, institutions, and individuals** across India.

Lifecare is a **certified organization** and is **accredited by ICMR and NABL**, underscoring our unwavering commitment to quality assurance, diagnostic accuracy, process integrity, and patient safety. Our operations are governed by stringent quality frameworks designed to meet and exceed national and international standards.

Diagnostic Package Offering

We propose a curated set of **diagnostic and preventive health check-up packages** recommended for **IMEI members and their immediate family members**. These packages are thoughtfully designed to support early detection, preventive care, and overall wellness, while maintaining affordability, accuracy, and clinical relevance.

The packages can be customized based on demographic needs, age groups, occupational health requirements, and organizational preferences.

No Sink Test / Process Compliance

As an **NABL-accredited laboratory**, Lifecare strictly adheres to high-standard diagnostic, pre-analytical, analytical, and post-analytical quality control processes. We ensure that **all our service partners, including logistics and collection partners, comply with the same quality benchmarks** to maintain consistency and accuracy across the service chain.

We would like to clearly state that **Lifecare does not align with or support any “sink test” practices** or any process that may compromise sample integrity, diagnostic accuracy, or regulatory compliance. All diagnostic kits used are **leak-proof, spill-resistant, and compliant with standard biomedical transport safety norms**, ensuring complete safety and zero risk during transit and handling.

Pan-India Coverage & Data Requirement

To ensure seamless service delivery and efficient expansion planning, we request **member location data**, preferably in the following formats:

- **City-wise details**, and/or
- **Pincode-wise details**

This data will enable us to:

- Map serviceable and non-serviceable locations
- Appoint and onboard **authorized service providers** in regions where Lifecare’s direct presence is currently unavailable
- Maintain optimal **turnaround time (TAT)**, service consistency, and quality compliance across all locations

Accurate location mapping will help us deliver a uniform, high-quality diagnostic experience to all members, irrespective of geography.-

In conclusion, we would like to reaffirm that **we are flexible with diagnostic package parameters** and remain open to customization based on your operational, clinical, or member-specific requirements. We sincerely welcome your **suggestions, observations, and recommendations**, and we are fully open to incorporating necessary changes, wherever feasible, **as guided by IMEI and your internal policies and standards**.

Our focus is to build a **long-term, transparent, and service-driven partnership** that prioritizes quality, reliability, and member satisfaction. We look forward to your valuable inputs and the opportunity to collaborate closely in delivering best-in-class diagnostic and preventive healthcare solutions.

Warm regards,

Lifecare Diagnostics

Rahul Thakore
